

## Electronic salary notification

elipsLife now offers all clients access to Swissdec's electronic salary notification (ESN) software. Designed to help companies submit their annual salary notifications for accident insurance, supplementary accident insurance and daily sickness benefit insurance, ESN software allows you to process all your salary notifications quickly and easily online, saving you time and money.

By switching to a uniform salary notification process, you can standardise and simplify the way you prepare your salary data and ensure it is forwarded securely to elipsLife. With a certified salary programme, you can send out all your salary notifications quickly and organise them according to the different recipients.

### The advantages at a glance

Switch to the Swissdec-certified payroll bookkeeping software and the elipsLife online service now to enjoy the following advantages:

- Transfer salary data online to elipsLife straight from your payroll bookkeeping system
- Reduce time lost to administrative tasks, since there is no need to collect data manually or enter it into different forms
- Send your salary data notifications to your local OASI administration office and include any other recipients in the same process
- Cut through complexity and make significant reductions in maintenance costs
- Identify and remove any potential sources of error

### What to do next

In addition to the Swissdec-certified payroll bookkeeping software, you will need an ESN profile to get started. Contact our Account Management team to order yours now by sending an e-mail to [account.ch@elipslife.com](mailto:account.ch@elipslife.com). Once you have your profile, simply add it to your payroll bookkeeping software and start sending out your salary notifications directly via Swissdec.

Should you have any questions, please feel free to call our Account Management team at any time on +41 44 215 45 42.

Swissdec have also put together a [fact sheet](#) (only available in German) with additional information about their ESN software.
